{qodors}

Practical Sheet

1. Write a C program to multiply two matrices

    Or

1. Write a C to Create a pattern as below. If I enter any number, number of inner diamond will create.

    For Ex : Enter your layer number : 2

```
        #
    #  #  #
 #  #     #  #
    #  #  #
        #
```

2. Write a C/C++ program which performs Binary Search

    Or

2. Write a C/C++ to Find entered word from string and display count of occurrence in the string. (Don't use Predefine function)

    For Ex :
    String = AABAACAADAABAAABAA
    Word = AABA

    Output
    Count = 3 occurrence.

3. Write a C/C++ program which performs Circular Linked List with a visual Form
